

With an Accountancy and Finance degree from the University of Exeter, you'll be able to:

- manipulate financial and other numerical data and appreciate statistical concepts
- locate, extract and analyse data from multiple sources and be effective in ICT
- present quantitative and qualitative information, with analysis, argument and commentary
- analyse the contexts in which accounting operates
- interpret and use the current technical language and practices of accounting
- record and summarise transactions and other economic activities

Where can your degree take you?

Skills, expertise and knowledge gained via an Accountancy and Finance degree are important if you want to pursue a career in accountancy, banking, management consultancy, and tax advisory work.

A first degree in Accountancy and Finance will also give you excellent transferable skills that can make you appealing to a wide range of employers, as well as preparing you for further study.

These are the kind of jobs, employers, and further study programmes that our recent Accountancy and Finance graduates have gone on to successfully pursue.
