

## With an Economics degree from the University of Exeter, you'll be able to:

- evaluate government policy and assess performance against home and global economies
- apply mathematical and statistical analysis to qualitative and quantitative data
- present findings and explain complex data to a wide range of audiences
- perform confidently in group discussions and produce a high standard of written technical and non-technical materials
- make logical recommendations whilst considering the wider social and political influences
- use technology skills (ICT) – including word processing, databases, internet communications, information retrieval and online searches

## Where can your degree take you?

Economists are employed in a variety of settings in both the public and private sectors. The skills and expertise developed through an Economics degree are utilised throughout the financial sector especially in research and analytical roles.

A degree in Economics will also equip you with skills that will allow you to move into other areas of employment.

Here is a snapshot of the jobs, employers, and further study programmes that our recent Economics students have progressed to soon after graduation.
