

Re-fillables

Live Package Free

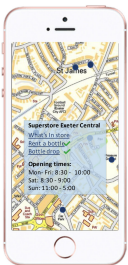

Why Re-fill?

Ocean Plastic is at an all time high, causing death of millions of marine creatures and costs the economy billions. Moreover, plastic is a toxin for wildlife. This ultimately damages human health through the water and the food we eat and drink.

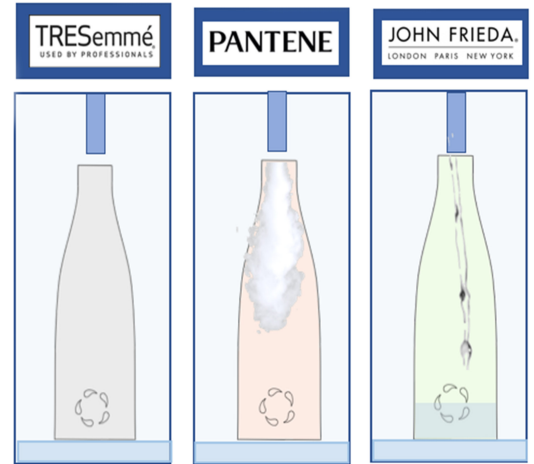

Sizes and Prices

The Re-fillables range comes in three distinct sizes, travel, medium and large. Each bottle is designed from recycled high density polyethylene guaranteed to last a lifetime. Travel sized bottles are priced at £5.00, medium at £10.00 and large at £15.00.

App
The App provides store and product availability information. Micro chip technology allows ease of shopping within store and quick payment.

How does it work?

Consumers bring their 'Re-fillables' bottles and place them under the dispenser. The machine first cleans the bottle with hot steam, it then fills bottle with the chosen liquid. The bottle is then stamped with a price and its contents.

Zero waste is leaked into the environment, it is therefore kept in a circular loop of production and consumption.
