

New MSc's expand Business portfolio

Two exciting cross-over MSc's have been launched for 2012 by the Business School and College of Engineering, Mathematics and Physical Sciences. Developed in consultation with Industry, the programmes will both be taught at the Streatham Campus.

MSc Information Technology Management for Business

- Provides an appreciation of the technical aspects and challenges of modern IT systems.
- Teaches the latest knowledge, tools and techniques for managing IT in business.
- Includes guest lectures from influential figures in large corporations.
- Offers an IT management placement over the summer with industry.

Programme leader Dr Zena Wood, said: *"The MSc ITMB degree combines the necessary business and computing knowledge to obtain the skills that are fundamental in today's industries and prepare students for management roles in the IT-related aspects of business"*.

MSc International Supply Chain Management

- Provides global management career opportunities across a wide variety of sectors involved in purchasing, supply chain and logistics.
- Develops management knowledge in purchasing, supply chain and logistics. Provides teaching and skills to overcome the challenges facing businesses in supply chain management.
- Teaches analysis tools and techniques based on interdisciplinary approach which includes management, engineering, mathematics, computing and software engineering and systems modelling.

www.exeter.ac.uk/engineering/postgraduate

Dr Stephen Childe, Co-Programme Lead commented on the new programme: *"In a changing world the managers of the future require the best tools to deal with developing markets. This programme opens up the issues of supply chain management and introduces the student to the modern approaches to doing business in this context"*.

New BSc Environmental Science programme for 2012

In response to requests from home and international students the University has created a new undergraduate degree in Environmental Science for 2012 entry. The programme will be taught at the University's Cornwall Campus and will take full advantage of the unique local environment for fieldwork.

BSc Environmental Sciences

- Enables students to learn the science behind the Earth's amazing complexity and its environmental processes whilst also gaining an understanding of socio-political impacts e.g. Energy Policy, Environment and the Media and Environmental Law.
- Students will benefit from exposure to cutting-edge research through the programme's close relationship with the University's Environment and Sustainability Institute (ESI) – an interdisciplinary centre leading research into the consequences of environmental change and the mitigation and management of its effects.
- Led by expert staff, UK and overseas field trips are embedded into modules throughout the degree and include fieldwork in the amazing ecosystems of the Mojave Desert and West Coast Redwood Forests in California.

The Syngenta One Planet MBA Scholarship

Syngenta is one of the world's leading companies with more than 26,000 employees in over 90 countries dedicated to one purpose: bringing plant potential to life. Through world-class science, global reach and commitment to their customers they help to increase crop productivity, protect the environment and improve health and quality of life. For more information about Syngenta please visit www.syngenta.com

The University of Exeter is delighted to announce a unique MBA Scholarship donated by Syngenta. In offering the Scholarship, Syngenta is keen to support the development of managerial talent in developing economies, encourage more sustainable approaches in business and, particularly, to promote awareness of the challenges and potential solutions to food security issues around the world.

The Syngenta One Planet MBA Scholarship covers the full tuition fee for the MBA in 2012/13 (£19,000). Eligible candidates will need to meet the full entry requirements for the MBA, but also have a background or demonstrable interest in food security and be a citizen of an emerging market country (preferably from Latin America, Asia Pacific or South Asia). See further details at: www.exeter.ac.uk/business-school/mba/programme/full-time/funding

Exeter celebrates 25 years of leading research into children's health and exercise

The University of Exeter recently marked a quarter of a century of leading research into children's health and wellbeing. The University founded the Children's Health and Research Centre (CHERC) 25 years ago in response to the preliminary report by the University's Coronary Prevention in Children Research Group. At the time little was known about how children's bodies respond to exercise in relation to growth and maturation, and children were mistakenly treated as 'mini-adults'.

The Centre has now disseminated its research through over 600 publications, including 17 books and over 100 book

chapters and review papers. The Centre team has been invited to present its research in 41 countries, made over 500 presentations to international and national conferences and presented over 100 workshops for teachers, paediatricians and researchers.

In addition to its research programme the Children's Health and Exercise Research Centre provided the first PhD training and the first taught MSc programme in paediatric exercise science in the UK.

For further details about the Centre and the programmes available in Sport and Health Sciences visit www.exeter.ac.uk/sportscience

PhD funding opportunities in Humanities

The College of Humanities at the University of Exeter is a vibrant international centre for new ideas, driven by ambitious and inspirational scholars in all its disciplines. Our expertise includes Archaeology, Classics and Ancient History, Drama, English, Film Studies, History, Modern Languages, Theology and Religion and Visual Culture.

In order to further enhance our position at the forefront of humanities scholarship

and research, we are pleased to be able to offer **up to seven, fully funded, International Student Doctoral Awards**.

Further details of these awards and any others offered by the College of Humanities can be found on the College Funding webpage.

Alternatively, please contact our postgraduate admissions team at: humanities-pgadmissions@exeter.ac.uk
