

# TECHNICIANS' DEVELOPMENT FRAMEWORK

## Our Partners

HEaTED published CATTs in 2014, Exeter being the first University in the UK to deploy CATTs for its technicians.

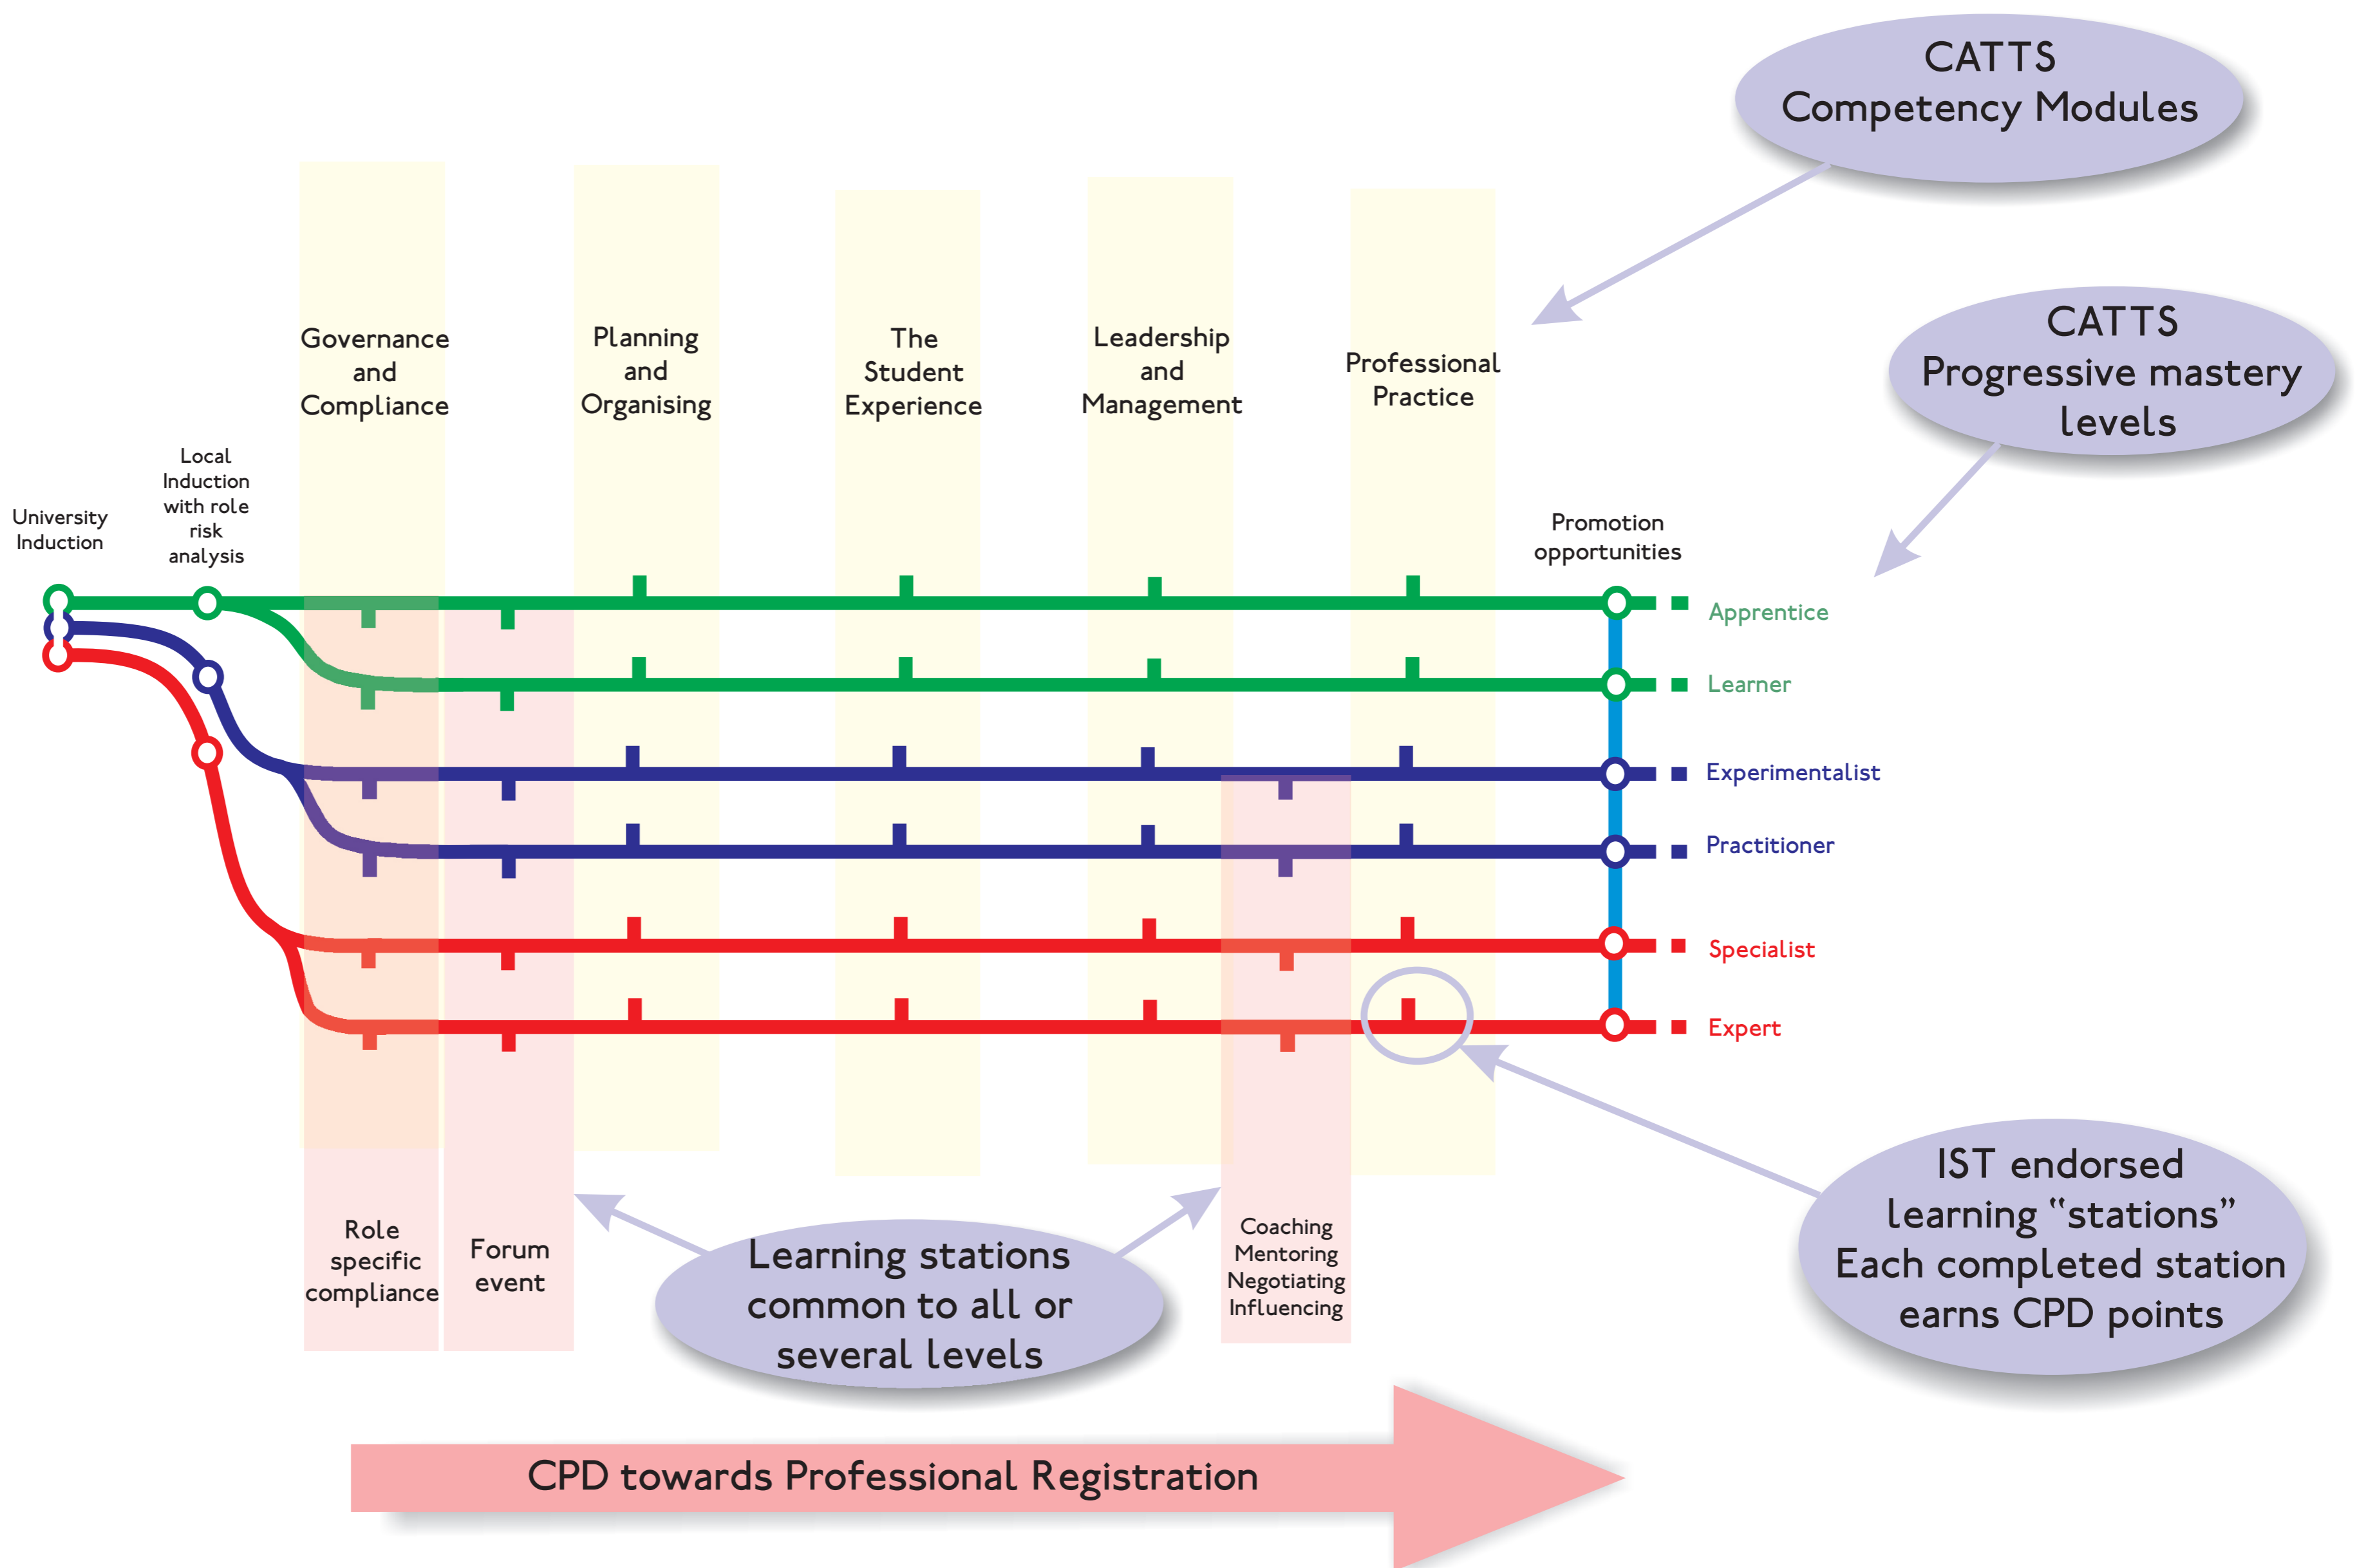

CATTs is a benchmarking framework which has been developed to help line managers and technical staff assess current competency and plan for future needs. It requires a continuous review process which aims to deliver excellence through an ongoing conversation around performance, capability and capacity.

## Our Partners

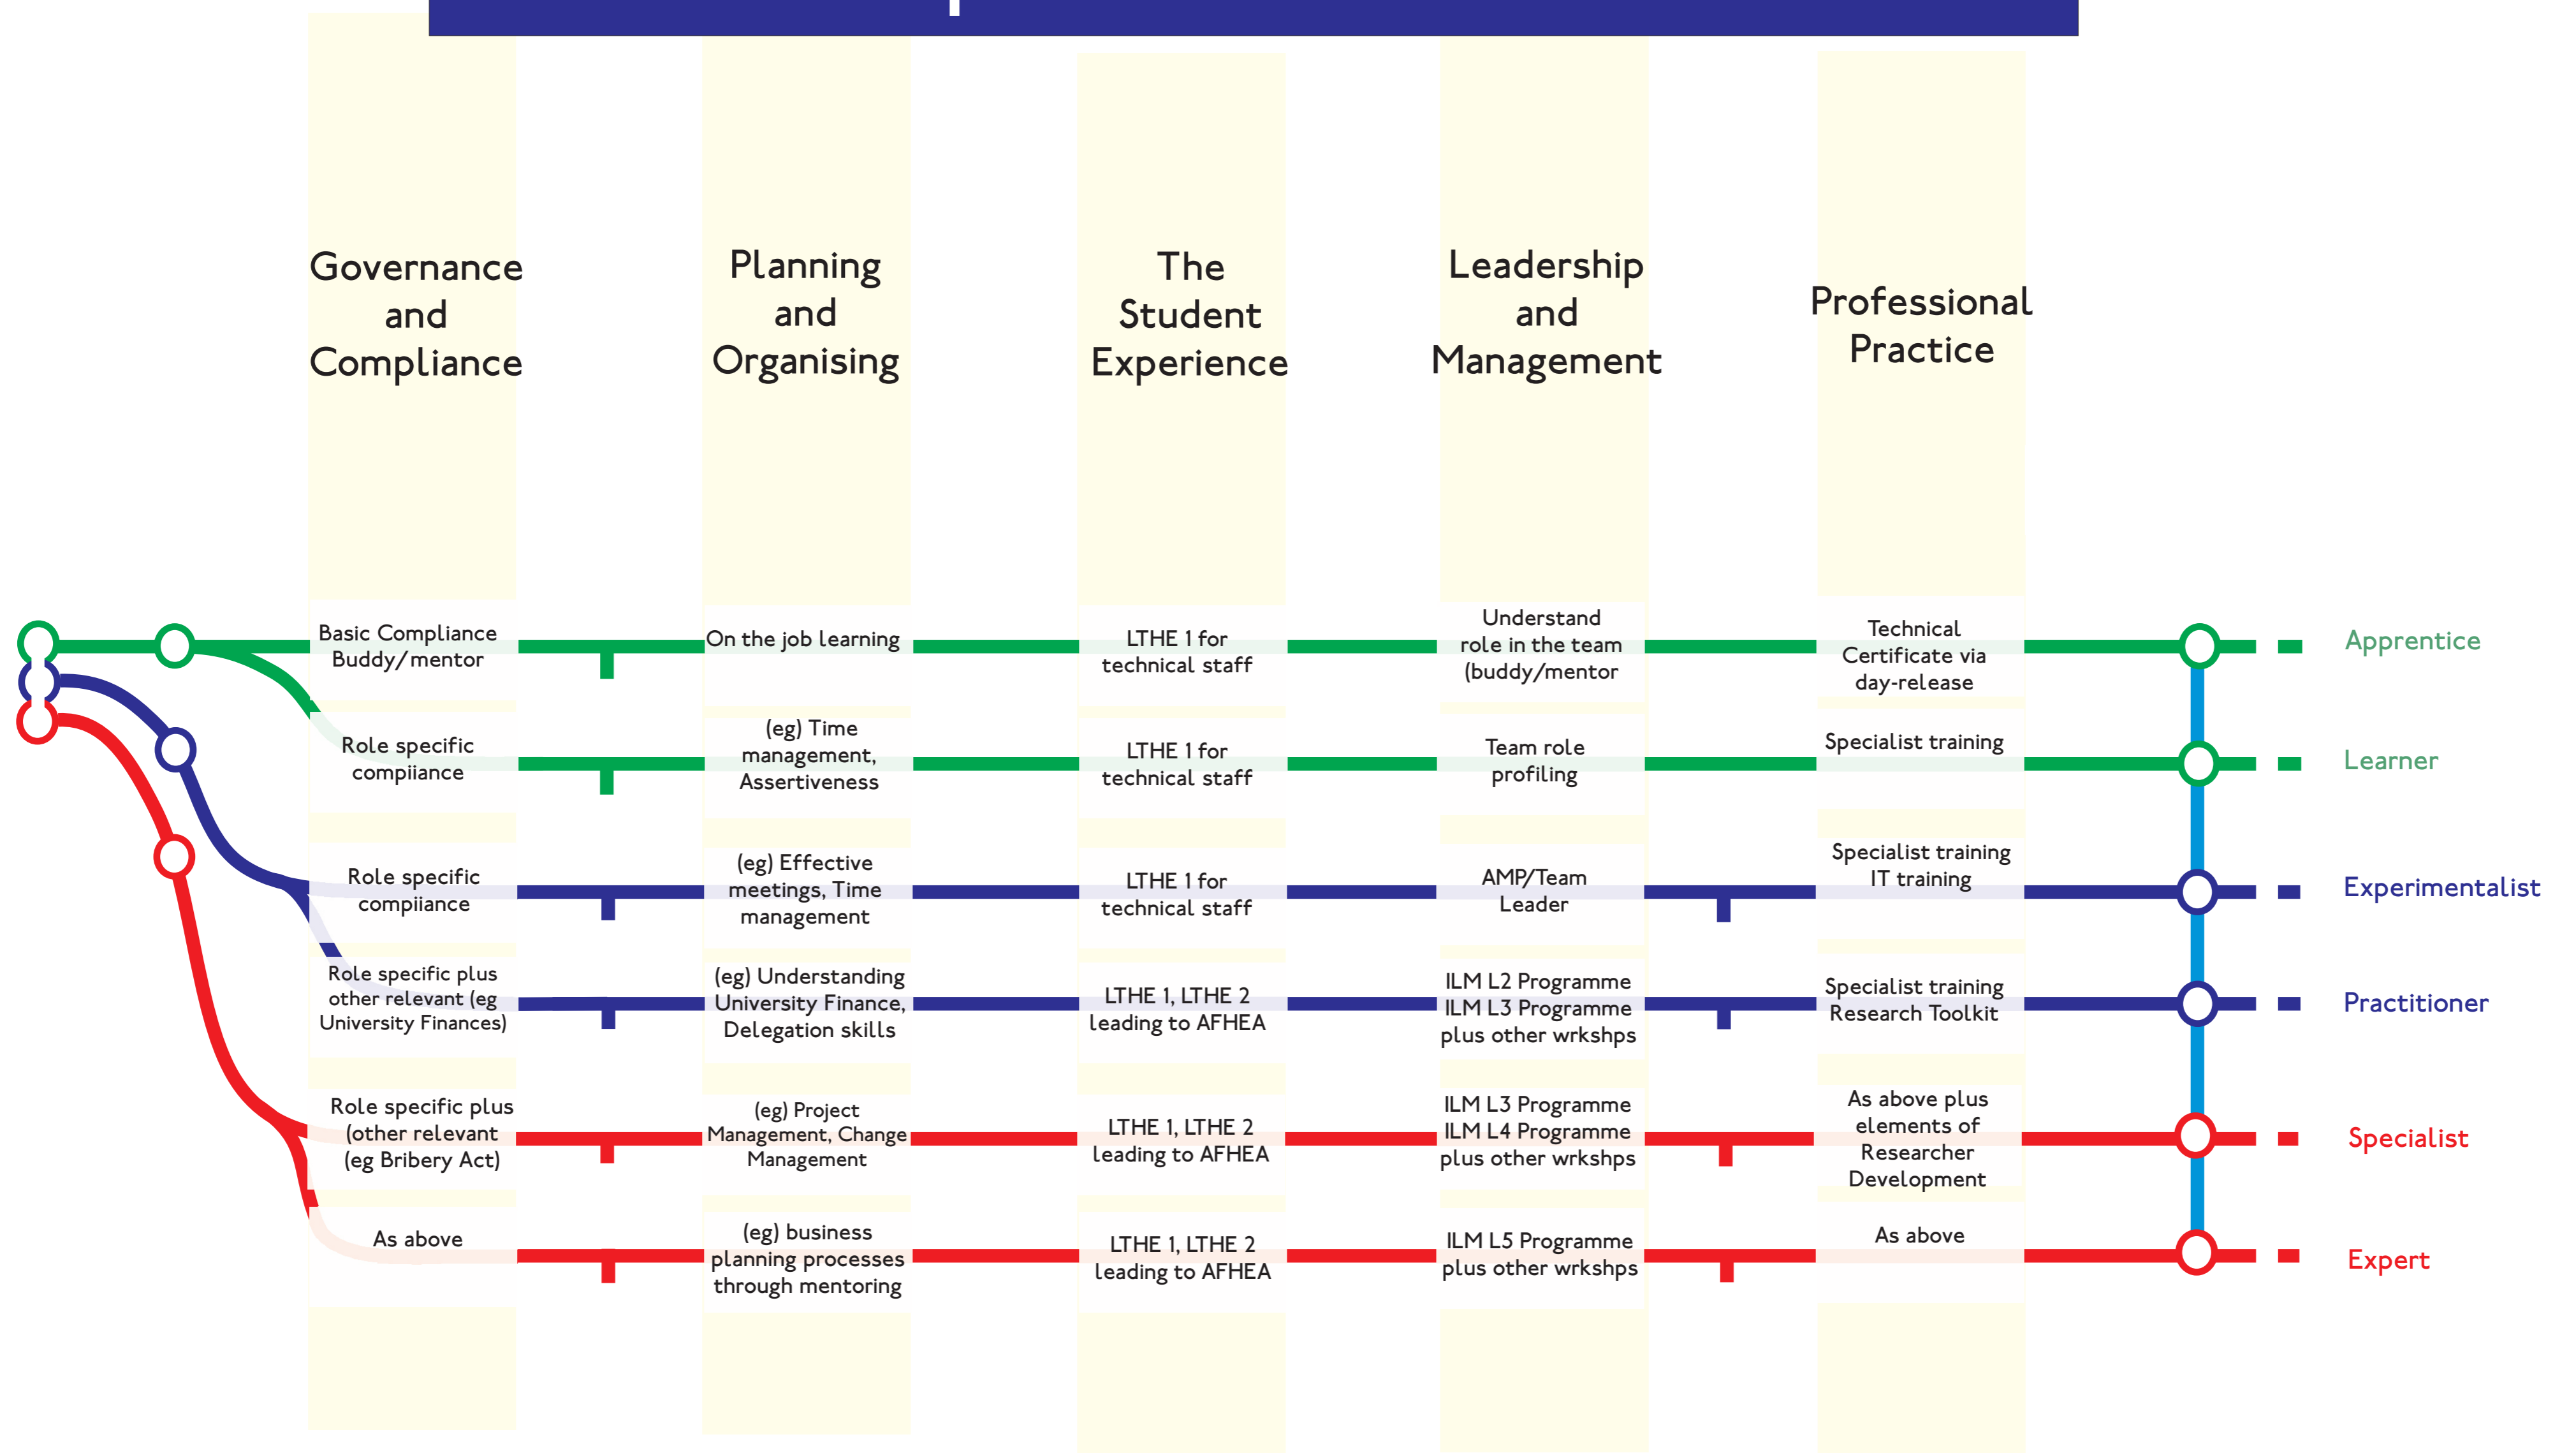

IST endorse all our Learning for technical staff enabling CPD points to be awarded to delegates.

IST are an Awarding Body for Professional Registration, so that members can undertake our Learning and gain experience that contribute towards a range of progressive qualifications that are becoming a requirement for all technical staff:  
Rsci - Registered Scientist  
RsciTech - Registered Technician  
Csci - Chartered Scientist

# LEARNING OPPORTUNITIES examples for each level
