The range of modules on offer is really impressive from a relatively small department. I also like the fact that Sociology, Anthropology and Philosophy all overlapped and interlinked, giving students the ability to explore a range of areas in their degrees.

The department makes you feel really welcome, and values you as a student member. I find all my lecturers approachable and all modules have been enjoyable. It is good to know that you’re getting a top notch education too, with Exeter ranking highly in many league tables, for Sociology in particular.

There is no doubt that this campus has energy. The prominence of the Students’ Guild is really important. There is a sense of community and support. The guild are there to help you for whatever you need. They do a fantastic job at creating a friendly and upbeat environment here at Exeter.

Issy, studying Sociology
Sociology is a fascinating subject providing a critical understanding of all aspects of society and social life. By studying Sociology you will develop an understanding of the contemporary world, human behaviour and the forces shaping society. You will examine social, political, historical, cultural and economic issues and study topics as diverse as class and social inequality, health and disability, globalisation, crime, family life, and gender. Sociology is particularly concerned with social transformation and explores how societies are formed, develop and may change in the future.

At Exeter we have a distinctive focus on cultural sociology and offer modules on topics such as the sociology of music, culture, science and technology, health and crime. We also have significant expertise in anthropology with modules covering issues such as addiction and human/animal interactions.

Our Criminology programme builds on our research strength and interests in policing, prisons and probation but also combines them with interests and strengths in international conflict; war and crime; and transitional justice and human rights.

The research conducted by our academics in Criminology has attracted substantial funding grants, such as Dr Katharine Boyd’s grant from the College of Policing and HEFCE, for the Exeter Policing, Evidence and Research Translation (ExPERT) project. Working with University colleagues and Devon and Cornwall Police, she and colleagues at the University will train officers in conducting and evaluating research about the forms of policing that work best.

Your degree will provide you with insight into contemporary society, as well as practical and transferable skills sought after by major employers and relevant to a wide range of careers in the private, public and third sectors including business, journalism, marketing, social research, teaching, retailing, human resources, overseas development, government and the civil service.

Sociology and Criminology are taught in the department of Sociology, Philosophy and Anthropology. Each aims to answer fundamental questions about our past, present and future. The close relationship between these three subjects is indicative of the interdisciplinary nature of the department in which Sociology can be studied either as Single Honours, or in combination with several other arts and social science subjects, including Philosophy and Anthropology. The department is small, ambitious and highly successful, and you will benefit from a friendly atmosphere and exposure to the latest inspirational advances in social science research.

Research interests of our academic staff span across a spectrum of topics in sociology, anthropology and philosophy. Our research was ranked 9th in the UK for world-leading and internationally excellent research in the Research Excellence Framework 2014 and is particularly noted for the contributions it makes to the sociology and anthropology of culture (science and technology, health, and the arts, among other themes) and the sociology of knowledge and social theory.

As an undergraduate you will benefit from this research culture as your lecturers will be contributing to current debates, giving you access to the latest thinking and resources.

Our undergraduates have established a departmental student society which meets several times a year and organises a seminar series with members of staff to provide an arena outside the formal teaching structure in which staff and students can discuss sociological issues.

www.exeter.ac.uk/ug/sociology

---

1 Research Excellence Framework 2014 based on the percentage of research categorised as 4* and 3*.
2 Value of bursary depends on length of placement.
**DEGREE PROGRAMMES**

Our undergraduate degree programmes provide an overview of very different types of societies and enable you to study aspects of these societies in depth.

We will help you become an independent learner and develop sociologically informed judgements. Our programmes are demanding and encourage initiative and open-mindedness, ensuring that you will be well equipped with a range of academic, personal and professional skills. You will develop the ability to undertake independent research and work to deadlines; digest, select and organise material for written work and oral presentations; critically reflect on and evaluate your own and others’ work; understand, assimilate and evaluate complex arguments and ideas; work with others as part of a team; and to think and write clearly about broad themes.

In your core modules you’ll learn to use logical and systematic methods of analysis to reveal patterns of social action. These will include qualitative research methods such as conducting interviews, focus groups and visual analysis; learning how to design your own research projects; and obtaining an overview of the use and interpretation of quantitative data.

Each year, depending on your degree programme, you may elect to take options outside of your programme, for example: to develop skills attractive to employers such as language proficiency; to examine an issue you’ve covered in one of your Sociology modules from a different disciplinary perspective; or to widen your horizons and challenge yourself intellectually.

Sociology can be studied in combination with other subjects in a range of Combined Honours degree programmes or as a Single Honours degree.

**HOW YOUR DEGREE IS STRUCTURED**

Degrees are divided into core and optional modules, giving you the flexibility to structure your degree according to your specific interests. Individual modules are worth 15 or 30 credits each and full-time undergraduates need to take 120 credits in each year. Within Sociology, in addition to the core modules, you can choose from an extensive range of options in all three years, a few examples of which are shown later in this brochure.

For up-to-date details of all our programmes and modules, please check www.exeter.ac.uk/ug/sociology

**SINGLE HONOURS**

**BA Sociology (EXETER)**

<table>
<thead>
<tr>
<th>L300 3 yrs with Study Abroad L302 4 yrs</th>
</tr>
</thead>
<tbody>
<tr>
<td>AAB-ABB</td>
</tr>
</tbody>
</table>

- Introduces you to ways of thinking about, seeing and investigating the social, cultural and political world in which we live
- Core modules cover the history and development of sociological theory and the skills and techniques employed in sociological research
- Develop a critical understanding of the rise and transformation of modern societies, with a particular focus on the last three decades, considering issues such as globalisation, migration and class

**Year 1** The first year provides the foundational knowledge and theoretical framework for your degree. You will learn how sociologists study human society and the challenges they face by examining the work of sociologists on topics as diverse as crime, mental illness, and power. You will also develop skills in formulating and debating an argument, for example through project work examining the social significance of material objects.

**Year 2** You will be required to take compulsory modules in theory and method which build upon the first year and are intended to equip you with the expertise to take specialist options during your degree. You’ll be able to choose from a wide range of Sociology options covering topics as diverse as consumption, music, health, gender and media.
**Final Year** The centre-point of the final year is the compulsory dissertation. This provides you with the opportunity to explore an area of interest and to demonstrate what you have learned to date. In addition, you will take up to three other specialist modules to create a programme of work which reflects your interests.

**BSc Sociology (EXETER)**

L303 3 yrs  
with Study Abroad L304 4 yrs  
AAB-ABB | IB: 34-32 | BTEC: DDD-DDM

- Develop an understanding of how societies, institutions and practices came into being, how they work and might change in the future
- Particularly concerned with social transformation; you will develop an insight into the major challenges facing contemporary society, with a particular focus on crime and deviance
- Learn a variety of techniques used in sociological research including observation, fieldwork, focus groups and the analysis of quantitative data

**Year 1** Your first year will give you an excellent grounding in the theories and application of sociology with a particular focus on the issues facing the contemporary world such as social inequality, crime, deviance, migration, and globalisation.

**Year 2** In your second year, you will develop the skills used by sociologists to understand how societies operate. In addition to gaining hands-on experience of designing your own research project and collating primary evidence, you will practise the techniques used in ethnography and explore case studies on topics as varied as social media and the British independent music scene. You will also be able to choose from a wide range of options covering issues such as terrorism, addiction, gender, consumerism, the Holocaust and immigration.

**Final Year** The centre-point of the final year is the compulsory dissertation which may draw on empirical data or your own original fieldwork. This provides you with the opportunity to explore an area of interest and to demonstrate what you have learned to date. In addition, you will take up to three other specialist modules to create a programme of work which reflects your interests.

**BSc Criminology (EXETER)**

M900 3 yrs  
with Study Abroad M901 4 yrs  
AAA-ABB | IB: 36-32 | BTEC: DDD-DDM

- Aims to provide systematic understanding of the historical patterning of crime, the causes of criminal behaviour and its consequences, as well as policy response
- The interdisciplinary make-up of the programme is rooted in sociological approaches, but also offers the potential to combine these perspectives on crime and deviance with those from historical, political, and psychological studies
- Gain a full range of social science research skills that will enable you to engage with the nature and complexity of social life, deviance and crime, graduating with specific technical skills sought by employers
- You will benefit from the opportunity of a work placement supported by a bursary of up to £2,000* and have access to specialist training resources.
- The work placement gives you an opportunity to put your new skills into practice, as well as experience data analysis tools and techniques being used in the real world
- Choose from a wide variety of placements locally, nationally and in Europe; from public sector organisations to industry to NGOs

**BA COMBINED HONOURS**

**BA Philosophy and Sociology (EXETER)**

VL53 3 yrs  
with Study Abroad VL5H 4 yrs  
AAA-ABB | IB: 36-32 | BTEC: DDD-DDM

- Value of bursary depends on length of placement.

**BA Politics and Sociology (EXETER)**

LLH2 3 yrs  
with Study Abroad LL23 4 yrs  
AAA-ABB | IB: 36-32 | BTEC: DDD-DDM

- Enables you to study the social organisation, economy and cosmology of a range of societies together with their political ideas, institutions and practices
- Take the core modules in politics and sociology in order to gain the foundations of these two disciplines
- In the final year, you will take a dissertation in either sociology or politics, depending on your own area of interest
Fully explore how relevant the discipline is for the study of our globalised world

Be introduced to sociological and anthropological ways of thinking from the classics in both disciplines to contemporary thinkers

Learn to understand and investigate diverse phenomena such as witchcraft beliefs in the past and present, rituals around spectator sports, consumer behaviours and the social construction of scientific knowledge

Investigate the causes of criminal behaviour as well as its consequences for victims and for society as a whole

Pay particular attention to the role of criminal justice organisations in defining and responding to crime as a social problem

Gain sociological, historical, political and psychological perspectives for understanding and responding to crime and deviance

Explore theoretical, empirical and methodological issues associated with sociology and other fields of social research, and develop skills in critical analysis

Develop an understanding of the contemporary world, human behaviour and the forces shaping society

Examine social, political, historical, cultural and economic issues

Study topics as diverse as class and social inequality, health and disability, globalisation, crime, consumption and migration

A modern language module will enable you to develop strong skills in spoken and written language, whilst your cultural modules will offer you a deeper understanding of the literature, history and culture of societies

Third year spent studying abroad developing your language skills

Combining two subjects where there is currently no existing Combined Honours degree at the University. These subjects can fall across departments, creating a cross-college degree

Study three subject areas if compulsory modules allow

Take modules from a variety of departments by studying one of our thematic pathways

Further information and the full list of available subjects can be found at www.exeter.ac.uk/ug/flexible

Depending on your programme you may take up to 30 credits in another subject, for instance a language or business module, to develop career-related skills or widen your intellectual horizons. If you achieve at least 60 credits in a language via our Foreign Language Centre you may be able to have the words ‘with proficiency in’ and the language added to your degree title. Further details about the FLC can be found at www.exeter.ac.uk/flc
LEARNING AND TEACHING

We convey sociology as a dynamic and self-questioning mode of social scientific inquiry, in order to impart knowledge and understanding of the nature, development and structure of contemporary societies, and give an in-depth focus on the core features of those societies. We encourage independent study and assist the development of sociologically informed critical judgement.

The nature of university learning, especially in the arts and social sciences, involves a lot of self-directed study and research. As well as traditional lectures, seminars, and tutorials, led by internationally respected academics at the forefront of research, you’ll be encouraged to use your initiative by organising study groups, taking advantage of online and traditional learning resources, and managing your own workload and time.

CONTACT HOURS
You should expect around 10 contact hours per week in your first year and will need to plan additional hours of private study per module. Your total workload should average about 40 hours per week during term time.

You will have regular tutorials where you will meet to discuss oral and written assignments with your tutor, together with a small group of other students. These personal contacts are very important in developing staff–student relations and for getting to know your fellow students. Our programmes help to develop skills and understanding so that you can take increasing responsibility for your learning in more specialised seminar-based modules.

You’ll be expected to develop good organisational and time management skills and we will help you acquire further employability skills (such as proficiencies in communication, research, presentation and IT). The modules within our degree programmes are designed to train you to gather, select and organise material from a variety of sources and evaluate its significance. We stress the importance of working flexibly and creatively with others, engaging in rational debate, and exercising independent thought and judgement.

INNOVATIVE TEACHING
We constantly introduce new methods of learning and teaching, including the use of interactive approaches through our virtual learning environment, where you can access detailed information about modules and learning outcomes, and interact via discussion forums.

The Student-Staff Liaison Committee gives you the chance to discuss and review the degree programmes, including existing and planned module content, through regular meetings with departmental staff.

RESEARCH-INSPIRED TEACHING
You will have the opportunity to work closely with academic staff who are at the cutting-edge of research and academic debate and you will benefit from an innovative curriculum inspired by leading research. All staff teach final year options which are linked to their own interests which include the study of culture, social media, consumption, music, science and technology, social inequalities and health.

ACADEMIC SUPPORT
All students have a personal tutor who is available for advice and support throughout your studies. There are also a number of services on campus where you can get advice and information, including the Students’ Guild Advice Unit. You can find more information about all the services in the University’s undergraduate prospectus or online at www.exeter.ac.uk/undergraduate

STUDY ABROAD
Studying for your degree at Exeter gives you the exciting possibility of spending up to one year abroad. Last year, almost 500 Exeter students studied at one of our partner universities, which are in more than 40 countries around the world. You could learn a new language and experience different cultures, become more self-confident and widen your circle of friends. You could get the chance to specialise in areas that are not available at Exeter, and when it comes to a career, your skills and knowledge of another country will prove invaluable to many employers. This of course applies equally to overseas students coming to study abroad at Exeter.

If you take Sociology with a modern language, you will normally spend your third year abroad. Please check the Modern Languages website for further details at www.exeter.ac.uk/ug/languages

For our other degree programmes, you may study for half a year at a partner institution in Europe, North America or Australia or follow a four-year ‘with Study Abroad’ programme. You may apply directly for the four-year programmes or transfer from another programme once you are at Exeter. Full details of these schemes and of our partner institutions can be found on our website at www.exeter.ac.uk/socialsciences/undergraduate/studyabroad

For further details about study abroad please check the International Office website at www.exeter.ac.uk/international/studyabroad/outbound

ASSESSMENT
We use diverse methods of assessment to support our emphasis on presentation, teamwork and projects/dissertations, as well as essay writing and exams. The ratio of assessment by coursework to assessment by exam varies according to which modules you take, but on average is about 50:50.

Your first year doesn’t count towards your final degree classification, but you do have to pass it in order to progress. If you study a three-year programme, assessments in the final two years both count towards your classification, and if you study a four-year programme, then the final three years all contribute.

For full details of the assessment criteria for each module, check the undergraduate section of our website at www.exeter.ac.uk/ug/sociology
EXETER Q-STEP CENTRE
Demand in industry and government for workers with quantitative skills is increasing. The growing reliance on and availability of open data, coupled with the phenomenal growth in social media data use, makes it essential that today’s social science graduates are equipped with the skills to manage, analyse and interpret data.

The Exeter Q-Step Centre builds on the core disciplines of Sociology, Criminology and Politics and International Relations in order to increase the number of students undertaking quantitative methods training in social science degree programmes. Research skills training, work placements and practical experience prepare students for further study and equips them with the skills they need to succeed in the job market.

For students who are interested in quantitative methods but are not taking one of the Q-Step BSc programmes, we also offer a Proficiency in Applied Data Analysis. Students successfully passing a minimum of 60 credits of data analysis modules (45 compulsory and 15 optional) may have the words ‘with Proficiency in Applied Data Analysis’ added to their degree title, for example: BA Politics with Proficiency in Applied Data Analysis.

For further information, please visit our website: www.exeter.ac.uk/socialsciences/q-step

---

I’ve had the opportunity to work as an intern for a charity in London called Citizens UK; I am currently looking to build a team in Exeter to focus on similar campaigns. This will all help me to improve my career prospects after graduation as employers now look for extra-curricular activities, as well as a degree, to find an applicant who has shown hunger for experience. Immediately after graduating, I can see myself helping young people to find work experience, activities and casual work.

James, studying Sociology and Criminology
YOUR SUCCESSFUL CAREER

RECENT GRADUATES ARE NOW WORKING FOR:
- National Centre for Young People with Epilepsy
- Scholastic
- Bodleian Libraries
- National Skills Academy
- KPMG

RECENT GRADUATES ARE NOW WORKING AS:
- Student Support Worker
- Sales Manager
- Marketing Assistant
- Graduate Library Trainee
- Audit Assistant
- Legal Service Manager
- Secondary School Teacher

▲ This information has been taken from the Destinations of Leavers from Higher Education (DLHE) Surveys 2014/15. Please note that, due to data protection, the job titles and organisations are listed independently and do not necessarily correspond.

CAREERS SERVICES
We have a dedicated, award-winning Careers Service, with offices at our Exeter and Penryn campuses, ensuring you have access to careers advisors, mentors and the tools you need to succeed in finding employment in your chosen field on graduation. We offer the Exeter Award and the Exeter Leaders Award which include employability-related workshops, skills events, volunteering and employment which will contribute to your career decision-making skills and success in the employment market. Our graduates compete very successfully in the employment market, with many employers targeting the University when recruiting new graduates. For further information about our Careers Service please visit: www.exeter.ac.uk/careers

TRANSFERABLE SKILLS
A degree in sociology gives you an excellent all-round education, where you’ll learn to understand other people’s points of view, communicate your own position clearly and argue effectively – skills very important to employers and to developing a successful career. You’ll also learn to collect, assess and present evidence and to work independently and in groups.
Please note that the availability of all modules is subject to timetabling constraints, and that not all modules are available every year. The modules detailed below are just examples of those offered recently.

For up-to-date details of all our programmes and modules, please check [www.exeter.ac.uk/ug/sociology](http://www.exeter.ac.uk/ug/sociology)

Please note that availability of all modules is subject to timetabling constraints and that not all modules are available every year. For up-to-date details of all our programmes and modules, please check the undergraduate section of our website at www.exeter.ac.uk/ug/sociology

**YEAR 1**

**Imagining Social Worlds 1 and 2: Texts and Artefacts**

These modules involve the systematic study of selected problems and questions in sociological research, with a focus on ethnographic and qualitative research. You will learn how artefacts can have different meanings and symbolism to different people, societies, times and cultures, and work in teams to construct and present your own hypotheses about the sociological significance of everyday objects.

**Introduction to Social Analysis: Classical Social Theory and Contemporary Social Theory**

You will be introduced to the core ideas, theoretical perspectives, methods of investigation and analysis that are distinctive to sociology and cognate disciplines. You will be asking what kind of knowledge of social phenomena it is possible to attain and how far such knowledge can be considered 'scientific' or 'objective', as well as how these issues have been discussed by key social theorists.

**Introduction to Social Anthropology**

This module introduces the methods and perspectives of social anthropology and engages you in the study of a diversity of societies and cultures. You will encounter a range of ethnographic and theoretical readings and you will be encouraged to develop an anthropological perspective of your own as well as solid research skills, and to think critically and analytically about key questions and problems in studying the worlds of other people and our own.

**Contemporary Society – Themes and Perspectives and Fields and Case Studies**

These modules complement the other first year modules by concentrating primarily on the subject matter of sociology. You will develop a critical understanding of the rise and transformation of modern societies from the 18th century to the present day, with a particular focus on the last three decades.

**Social Issues: Crime and Deviance Parts 1 and 2**

You will study crime and criminals, including the causes of criminal behaviour and its consequences for victims and for society as a whole. We pay attention to the role of society in defining and responding to crime as a social problem, and you will explore terrains which are often contested and develop a critical appreciation of the perspectives and methodological principles underpinning them.

**Introduction to Social Data**

This introductory first-year module covers key concepts in quantitative design and data collection as a basis for understanding such social phenomena. It introduces you to the core statistical ideas that underlie quantitative research and the software packages which are used to produce analyses. It teaches you to think critically about quantitative studies, not only examining how this data is created, but how it can be used in social contexts.

**YEAR 2 CORE MODULES**

**Ethnography**

Ethnography provides a means of exploring the ways in which people live, experience and think about their lives, particularly the networks of interaction and meaning they create and inhabit. This module will provide you with an appreciation of the kinds of topics and social issues that ethnographers work on in contemporary culture.

**Into the Field**

This module introduces you to methods of fieldwork-based inquiry that are strongly featured within the qualitative traditions of sociology and anthropology. The module focuses on learning through practical experimentation and involves the design of your own research project which will help prepare you for your dissertation.

**Knowing the Social World**

This module explores and provides hands-on experience of a variety of approaches to sociological research such as interview skills, participant observation, and sensory analysis.

**Theoretical Sociology**

You will survey a variety of perspectives in social theory. Topics can broadly be grouped under two headings, though interrelations between the two will be explored: general understandings of social relations and processes (such as ethnomethodology and actor-network theory); and big ideas about the shape of contemporary society.

**Quantitative Data Analysis in Social Science II**

A good understanding of data collection, analysis and interpretation is essential for much empirical research, and is becoming increasingly relevant for the competitive professional world. This module will provide students with knowledge of a wide range of quantitative analytical techniques. Using a combination of lectures, practical demonstrations and practical assignments, this module adopts a hands-on approach.

**FINAL YEAR CORE MODULE**

**Dissertation**

The dissertation gives you the opportunity to display your own abilities in researching and communicating your ideas in relation to a topic which really interests you. You may draw on empirical data gathered from library research or you own fieldwork.
<table>
<thead>
<tr>
<th>MODULES</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Globalisation</td>
<td>This module looks at the impact globalisation has had on contemporary society and asks whether we are living in a globalised world. After exploring different ways of understanding globalisation historically and theoretically, you will examine various case studies like the media, migration and terrorism, and their implications for identity and culture.</td>
</tr>
<tr>
<td>Immigration in Western Societies</td>
<td>The aim of this module is to introduce you to the study of ethnic minorities in Western countries based on the analysis of quantitative data, and to provide you with analytical tools required to reach evidence-based conclusions about immigrants and immigration in a comparative perspective.</td>
</tr>
<tr>
<td>Media in Society</td>
<td>Introduces you to the ways sociologists, anthropologists and cultural theorists have conceptualised media in Western society. With the use of specific examples, the module examines key issues in traditional and new media, and provides you with a basis to contextualise and critically appraise social change and collective and individual experiences.</td>
</tr>
<tr>
<td>On Violence</td>
<td>This module addresses three key questions: What is violence? How can we understand why it takes place? What can be done to reduce social harms? A broad range of violence is considered, including violence taking place in inter-personal communications, organisational behaviour, political governance, economic relations, and physical conflict.</td>
</tr>
<tr>
<td>Ethnomusicology</td>
<td>You will consider music’s consequences for social structure and social experience; consider some of the classic and current approaches within the sociology of music; and exemplify these approaches with reference to empirical studies in music sociology.</td>
</tr>
<tr>
<td>Introduction to Terrorism Studies</td>
<td>You will learn about the history of political and religiously-motivated violence, the subjective and debated definition of terrorism, as well as rates and trends of terrorism.</td>
</tr>
<tr>
<td>The Holocaust and Society</td>
<td>This module investigates the nature and causes of the Holocaust and stimulates reflection on the continuing significance of this momentous event for our understanding of human nature and social organisation. The module draws on theories, methodologies and concepts from sociology, social psychology, historical explanation and moral philosophy.</td>
</tr>
<tr>
<td>International Criminal Justice</td>
<td>This module is an introduction to comparative criminology and the nature and extent of crime cross-nationally. You will learn about similarities and differences in crime patterns, and responding to crime between and among countries around the world.</td>
</tr>
<tr>
<td>Consumption</td>
<td>The module will introduce key theories of consumerism and consumer culture, connecting theorists’ ideas to contemporary and historical social patterns. We will look at characteristic features of consumerism such as advertising, examine different sites and spaces of consumption such as the mall, the corner shop and mail order catalogues, and study major fields of consumption, namely food, fashion, and cars.</td>
</tr>
<tr>
<td>Gender and Society</td>
<td>We will consider gender as a social and cultural construction and evaluate the contribution gender studies make to sociology more generally. The module focuses in particular on cultural and non-cognitive dimensions of gender and places emphasis on gender and sexuality in daily life.</td>
</tr>
<tr>
<td>Addiction</td>
<td>What do we mean by ‘addiction’? In this module, you will critically analyse the concepts, practices and policy surrounding addiction, dependence, drug use and treatment in contemporary society.</td>
</tr>
<tr>
<td>Police and Policing</td>
<td>This module will introduce you to some of the key theoretical perspectives, critical issues and perennial debates in the study of the police, with a particular focus on policing in England and Wales. We will use a mixture of contemporary case studies and topical issues to examine key concepts, including the role of the police, police discretion, the use of force, police accountability and plural policing.</td>
</tr>
<tr>
<td>Disability and Society</td>
<td>Whilst commonly thought of as medical in nature, disability is a social issue that provides surprising insights into a range of sociological topics. You will look across cultures at how normality and deviance are understood, produced and controlled, and examine questions of social inclusion and exclusion, independence and dependence, and the constructedness of both disability and ability.</td>
</tr>
<tr>
<td>Culture and Perception</td>
<td>What is reality and how do we come to perceive reality in everyday life? This module considers reality as we represent, perceive and experience it through cultural mediators. We investigate realities as situated practices, drawing on and drawing together many things – technologies and objects, people, gestures, meanings, and media.</td>
</tr>
<tr>
<td>Sociology of Art and Culture</td>
<td>You will learn how cultural issues can be investigated sociologically, explore sociological viewpoints on the nature of artistic creation and other forms of cultural activity and analyse how the terms ‘art’ and ‘popular culture’ are used in different social contexts.</td>
</tr>
<tr>
<td>Health and Illness in Contemporary Society Parts 1 and 2</td>
<td>You will critically analyse current academic theories on health, illness and society. Taking an interdisciplinary approach and drawing on texts from medical sociology, health psychology and cultural theory, you will consider why ‘health’ has become a key social value in contemporary western society. You’ll cover the social patterning of ill-health in terms of health inequalities, as well as considering the collective practices of medicine within formal and informal healthcare.</td>
</tr>

</table>
We make every effort to ensure that entry requirements are up-to-date in our printed literature. However, because brochures are produced well in advance, our entry requirements and offers may be subject to change.

For up to date details regarding entry requirements and programme specifics, please see our Sociology pages at www.exeter.ac.uk/ug/sociology.

We strongly advise that you check this before attending an Open Day or making your application. Some programmes require prior study of specific subjects and may also have minimum grade requirements at GCSE or equivalent, particularly in English Language and/or Mathematics.

Applying to study Combined Honours with Modern Languages

When applying to a Combined Honours degree with a modern language you will need to indicate, under ‘further details’ in the ‘choices’ section of the application, the language you wish to study using the codes in the table. Please note you may choose only one language. For further information on completing your UCAS form, please visit www.ucas.com and for more information on language requirements for our Combined Honours degrees go to www.exeter.ac.uk/ug/languages.

Language requirements for Combined Honours with Modern Languages

☐ Grade B or 5 at GCSE in any modern foreign language is all that is required to study any of our seven languages on the Beginners’ route as part of a Combined Honours degree

☐ Grade B at A level is required in any language you intend to study from A level

☐ You may only choose one language

☐ Students pursuing language study on the basis of a GCSE are normally classed as Beginners

☐ French, German, Italian, Russian, and Spanish can be studied from A level or Beginners level, with both cohorts reaching degree level in the final year

☐ Chinese and Portuguese can normally only be studied from Beginners level with students reaching degree level in the final year

For details of language requirements or entry onto Combined Honours with Modern Languages programmes please visit our website: www.exeter.ac.uk/ug/languages

International students

If you are an international student, you should consult our general and subject-specific entry requirements information for A levels and the International Baccalaureate, but the University also recognises a wide range of international qualifications. You can find further information about academic and English language entry requirements at www.exeter.ac.uk/ug/international

For full and up-to-date information on applying and entry requirements, including requirements for other types of qualification, please see www.exeter.ac.uk/ug/applications

Accuracy of subject brochure information

The information in this subject brochure forms part of the undergraduate prospectus 2019 and is aimed at prospective undergraduate students wishing to apply for a place at the University of Exeter (the University) and start a course with us in autumn 2019. The prospectus and subject brochures describe in outline the courses and services offered by the University and we make every effort to ensure that the information provided is accurate and up-to-date at the time of going to print (undergraduate prospectus is printed January 2018 and subject brochures are printed in May 2018).

However, it may be necessary for the University to make some changes to the information presented in the prospectus following publication—for example, where it is necessary to reflect changes in practice or theory in an academic subject as a result of emerging research, or if an accrediting body requires certain course content to be added or removed. More information about our terms and conditions can be found at: www.exeter.ac.uk/undergraduate/applications/terms.

1 98% of our research was rated as 2*, 3* or 4* in the Research Assessment Exercise 2014.

2 Between 2006/07 – 2015/16, the University of Exeter saw the greatest rise in research income, compared to all other Russell Group universities.
