

University of Exeter

Graduate Destinations 2009

The University of Exeter has an excellent reputation with graduate recruiters and our students and graduates compete very successfully in the employment market. Many employers target the University when recruiting new graduates.

On the following pages you will find details of the destinations of graduates from the University of Exeter who completed courses in 2008*. The Destinations of Leavers in Higher Education (DLHE) survey from which the information is taken was conducted six months after the students had graduated and the survey showed that 92 per cent** of Exeter's first-degree graduates were in employment or further study.

Graduates from the University of Exeter are very employable and go into a wide variety of occupations when they finish their studies. This is reflected in the hundreds of different jobs listed in this booklet and is partly because Exeter offers an exceptionally wide range of opportunities for its students to gain the skills employers want. There are many ways for students to add value to their CVs, from management training to business placements, one of the UK's largest student volunteering programmes and pre-teacher training, to a world-wide network of study abroad opportunities and careers advice from our own successful graduates. Many of these activities involve employers who are keen to recruit Exeter students into their organisation.

The Careers and Employment Service organises a comprehensive programme of internship and placement opportunities available for students studying both at our campuses in Exeter and at our Cornwall Campus, near Falmouth. There are also many opportunities to meet graduate recruiters at our Careers Fairs, employer presentations and our innovative Virtual Careers Fair.

The Careers and Employment Service also works very closely with the Students' Guild on two important initiatives, The Exeter Award and The Works. The Exeter Award gives recognition for participation in 'employability' activities such as volunteering or interview training and The Works is a jobshop, staffed by students, with plenty of vacancies for part time work in the Exeter area.

We are confident that the University offers its students a comprehensive range of services and activities to help them become successful graduates in the job market or continue with further study and training.

To find out more about the Careers and Employment Service and employability at the University of Exeter, please see www.exeter.ac.uk/employability

** In cases of subjects with small student cohorts the data presented is an aggregate of destinations of the past 2-5 years*

*** Figures as at Jan. 2009, as a percentage of those respondents available for employment or study*

ACCOUNTING AND FINANCE

A degree in a business related subject from Exeter will help you to develop a wide range of skills such as analytical problem solving, teamwork, research and organising and communicating information.

The majority of graduates from the Business School follow their degree with a career in finance, banking or management both in the commercial and public sectors. A large number of graduate recruiters in these sectors visit Exeter to recruit our students. Some of our graduates pursue their interest in their studies to a greater depth by following a higher degree, often here at Exeter.

DESTINATIONS OF UNIVERSITY OF EXETER ACCOUNTING AND FINANCE GRADUATES

ARAB AND ISLAMIC STUDIES

A degree in Arab and Islamic Studies gives you an appreciation and understanding of the culture, history and language of the Middle East. You will develop analytical and research skills as well as an awareness of different interpretations of issues and events, develop opinions and use effective communication skills to put forward your ideas and conclusions. You will also develop your time-management skills.

All these skills are valued by employers from many different fields and can open up career paths in a wide variety of areas from academic research and government work to more commercially based careers in law and business.

DESTINATIONS OF UNIVERSITY OF EXETER ARAB AND ISLAMIC STUDIES GRADUATES

Full time UK domiciled undergraduates

(of those who completed their courses in the last five years, surveyed six months after graduation)

ARCHAEOLOGY

The Archaeology programmes at Exeter are designed to develop your skills of analysis, assessment and interpretation as well as the production of written and oral reports. The broad-based nature of the subject and of the skills it provides give a strong grounding for a wide range of careers, not only those related to archaeology but also in the wider fields of teaching, administration and business. Some of our graduates combine their initial job with voluntary archaeological work or with further part time study of the subject.

DESTINATIONS OF UNIVERSITY OF EXETER ARCHAEOLOGY GRADUATES

Full time UK domiciled undergraduates

(of those who completed their courses in the last two years, surveyed six months after graduation)

EMPLOYED

- MA Medieval Studies, University of Exeter
- MA English, University of Exeter
- MA Classics, Kings College London
- Graduate Diploma in Law, University of Plymouth

COMPUTING AND INFORMATION TECHNOLOGY

Our degree programmes will develop your skills in a variety of technical areas such as programming, as well as incorporating skills and knowledge from the related areas of mathematics, engineering and psychology. You will also acquire many more generic skills such as project management, working in teams, communication and the ability to manage your own time to meet tight deadlines.

Most of our graduates choose to use their technical skills to gain employment in IT related areas after graduation. Some of our graduates choose to continue their studies with a higher degree in their chosen speciality or to take a teaching qualification. Some graduates prefer to make use of the wider skills they learn at Exeter and enter a variety of careers in finance and business management.

DESTINATIONS OF UNIVERSITY OF EXETER COMPUTING GRADUATES

Full time UK domiciled undergraduates

(of those who completed their courses between 1 August 2007 and 31 July 2008, surveyed six months after graduation)

EARTH RESOURCES

(Geology, Mining Engineering and Renewable Energy)

A degree in Earth Resources from our Cornwall Campus will give you the practical and vocational skills to pursue a career in related fields, such as mining, exploration or the renewable energy sector. It will also give you a range of broader skills in teamwork, problem solving and communication. A very high proportion of graduates enter minerals-related employment, either in the UK or overseas. There are worldwide career opportunities including Europe, South America, Australia and Africa.

Other graduates move into related areas such as tunnelling, civil engineering design or the oil and gas industry. However, recent graduates are working in fields as diverse as sales and marketing and operations management for major UK minerals providers. Some graduates opt to continue their training by undertaking taught postgraduate (MSc) courses in geotechnical engineering or computing or undertake research degrees (MPhil/PhD).

DESTINATIONS OF UNIVERSITY OF EXETER EARTH RESOURCES GRADUATES

Full time UK domiciled undergraduates

(of those who completed their courses between 1 August 2007 and 31 July 2008, surveyed six months after graduation)

ENGINEERING

A degree in Engineering from Exeter will open many doors to future careers. During the course you will develop a wide range of highly employable general skills such as project management, time management, IT and communication, alongside your specific engineering knowledge. These skills are all highly prized by recruiters and many leading employers actively target our engineering graduates.

Most of our graduates choose to enter a technical career in industry after their degree studies, however some prefer to use their skills in more generalist areas such as finance or general management. Others choose to continue their studies with a higher degree in engineering or study to become a teacher.

LAW

A Law degree from the University of Exeter, whether studied at our campus in Exeter or in Cornwall*, will equip you with a wide range of skills suitable not only for careers as a solicitor or barrister but also in the wider world of finance, administration and commerce. Skills such as assimilation of large amounts of material, writing concise reports and problem solving, which you will develop during your degree, are vital to a range of graduate recruiters. The majority of our Law graduates follow their degree with further study in the law and then enter a training contract with a firm of solicitors or enter a pupillage in a Barrister's chambers. The Careers and Employment Service organises an annual Law Fair for students wishing to pursue a legal career.

* Our Cornwall Campus took its first Law students in 2007.

MATHEMATICS

A degree in Mathematics from Exeter will equip you with a wide range of skills both specific to your subject and also more general. Specific skills will include an analytical approach to problem solving, handling data and a readiness to tackle new concepts. In addition you will develop the ability to work independently, work to tight deadlines and develop communication skills. All of these are highly prized by employers.

Our graduates enter a wide variety of fields where their analytical skills are valued both in business and in the public sector. Areas such as finance and actuarial work are particularly popular. A number of graduates each year decide to follow their degree with higher degree study in an area of particular interest or to study to become teachers.

MEDICINE

Our Bachelor of Medicine, Bachelor of Surgery (BMBS) degree is taught by the Peninsula College of Medicine and Dentistry (PCMD), a partnership between the Universities of Exeter and Plymouth. The BMBS is a five-year degree which forms the first stage of training to become a doctor. Following this, graduates undertake two foundation years of clinical practice. In 2008, 142 student doctors graduated of whom 91 stayed in the South West to continue their training.

MODERN LANGUAGES

A Languages degree from Exeter aims to provide you with a range of academic, personal and professional skills that will prepare you confidently for future employment. Language skills can be used in a wide range of employment such as finance, law, customer service and the teaching profession. In addition to your knowledge of a foreign language you will develop skills such as gathering information and developing ideas as well as working to tight deadlines. During your year abroad you will not only learn to live in a different culture but you will develop independence and adaptability alongside a command of your chosen language(s). These skills are in demand by graduate recruiters.

PHYSICS

The course at Exeter will develop your skills in a variety of technical areas such as practical laboratory work, problem-solving, using advanced mathematical techniques and research. You will also acquire many more generic skills such as IT skills, project management, communication and the ability to manage your own time.

Many of our graduates choose to continue their studies with a higher degree in their chosen speciality. Others choose to use their knowledge of physics in an industrial setting or through teaching at secondary schools. Some graduates prefer to make use of the wider skills they learn at Exeter and enter a variety of careers in finance, IT and business management.

- PGCE Physics, University of Exeter

POLITICS AND INTERNATIONAL RELATIONS

Exeter Politics and International Relations graduates are highly successful in obtaining graduate employment or moving on to take further study. Whether you study at our campus in Exeter or in Cornwall*, you will develop a number of skills that are useful in professional and managerial careers. The ability to research and analyse information from a variety of sources, together with the written and verbal skills needed to present and discuss your opinions and conclusions, are attributes that many employers look for in graduates. Your understanding of complex political and cultural issues, often in continually changing environments, can also be relevant to both business and public sector appointments.

**Our Cornwall Campus took its first Politics students in 2007*

PSYCHOLOGY

Our BPS-accredited programmes provide you with a range of academic, personal and professional skills that will prepare you for employment, future study or training for professional practice. As a Psychology graduate you'll possess a wide range of skills and a broad range of knowledge about people and how they function and adapt to various circumstances. Our graduates are scientists who can design experiments, analyse data and use computers. These skills can give a foundation for careers in research, high technology industries or management, personnel, legal and advertising services. You'll have communication skills that form the basis of careers in marketing and the economic world. You'll be able to help people, in personnel roles or in the caring professions. You'll be able to progress in many branches of professional psychology, such as, clinical, educational or research. An essential transferable skill is the ability to present well at interview, which will enhance your employment prospects in a competitive environment.

RADIOGRAPHY

Our Medical Imaging (Diagnostic Radiography) degree is accredited by the Society and College of Radiographers and the Health Professions Council. It produces graduates who combine the technical and scientific skills required by practising radiographers with a strong academic science knowledge base. Interprofessional learning is a core element of the programme and enables students to develop the insight and skills required to work effectively in a multi-disciplinary hospital setting. The vast majority of our graduates to date have entered careers as radiographers in clinical departments or related work using their degree.

DESTINATIONS OF UNIVERSITY OF EXETER RADIOGRAPHY GRADUATES

SPORT SCIENCES

You can be secure in the knowledge that a Sport Sciences degree from Exeter has a high academic standing and will provide opportunities to develop a range of problem-solving, decision-making, personal communication and leadership skills that are demanded in many careers. The degrees are first and foremost honours degrees in science. That means that you can use them as you would any other science degree to get a job on the basis of being accomplished at doing degree-level scientific work and many of our graduates use their degrees successfully to gain employment outside of exercise and sport science. Many employers target the University when recruiting new graduates and the programme has a designated Careers Tutor who liaises with the Careers and Employment Service.

the \mathbb{R}^n -valued function \mathbf{f} is a solution of the system (1) if and only if \mathbf{f} is a solution of the system (2).

Let us assume that \mathbf{f} is a solution of the system (2). Then, for any $t \in \mathbb{R}$, we have

$$\mathbf{f}(t) = \mathbf{f}(0) + \int_0^t \mathbf{f}'(s) ds = \mathbf{f}(0) + \int_0^t \mathbf{A}(s) \mathbf{f}(s) ds.$$

Since \mathbf{f} is a solution of the system (2), we have $\mathbf{f}(0) = \mathbf{0}$. Therefore, we have

$$\mathbf{f}(t) = \int_0^t \mathbf{A}(s) \mathbf{f}(s) ds.$$

Since \mathbf{f} is a solution of the system (2), we have $\mathbf{f}(0) = \mathbf{0}$. Therefore, we have

$$\mathbf{f}(t) = \int_0^t \mathbf{A}(s) \mathbf{f}(s) ds.$$

Since \mathbf{f} is a solution of the system (2), we have $\mathbf{f}(0) = \mathbf{0}$. Therefore, we have

$$\mathbf{f}(t) = \int_0^t \mathbf{A}(s) \mathbf{f}(s) ds.$$

Since \mathbf{f} is a solution of the system (2), we have $\mathbf{f}(0) = \mathbf{0}$. Therefore, we have

$$\mathbf{f}(t) = \int_0^t \mathbf{A}(s) \mathbf{f}(s) ds.$$

Since \mathbf{f} is a solution of the system (2), we have $\mathbf{f}(0) = \mathbf{0}$. Therefore, we have

$$\mathbf{f}(t) = \int_0^t \mathbf{A}(s) \mathbf{f}(s) ds.$$

Since \mathbf{f} is a solution of the system (2), we have $\mathbf{f}(0) = \mathbf{0}$. Therefore, we have

$$\mathbf{f}(t) = \int_0^t \mathbf{A}(s) \mathbf{f}(s) ds.$$
