

Pulse Secure – Centos 6 and 7

Instructions

Download the installer package from <https://as.exeter.ac.uk/it/network/vpn/>

```
rpm -ivh <package name>
```

e.g.

```
rpm -ivh ps-pulse-linux-5.2r6.0-b977-centos-rhel-installer.rpm
```

Install dependencies by running the following script

```
/usr/local/pulse/PulseClient.sh install_dependency_packages
```

Start the VPN connection

```
/usr/local/pulse/PulseClient.sh -h vpnsecure.exeter.ac.uk -u <username> -r Exeter
```

refer to the readme file in /usr/local/pulse for cli commands.
