

TH!NKUK NORTH AMERICA

18th – 22nd JANUARY 2021

INTRODUCTION

This year has been difficult for UK universities to connect with you, our partners in Canada and USA. Although we all hope that spring will come with great news in the fight against the pandemic, we're still keen to engage with you and provide guidance and information as you look at studying in the UK.

TH!NKUK will be the largest scale event organised specifically by UK universities, bringing England, Wales and Northern Ireland higher education at the tip of your fingers. TH!NKUK week will cover everything from submitting your UCAS applications, right through to arriving in the UK.

This week we will provide opportunities to engage with International Officers, academics, current UK university students from North America and our alumni. We have sessions focused towards students, parents, teachers and school counsellors, but everyone is welcome to 'think UK'!

SESSIONS OVERVIEW

General Sessions: Co-presented by university reps - are designed to give you information on studying in the UK and how to apply

Academic Sessions: these give an overview of your specific subject area of interest from different universities

Student/Alumni Panels: hear from current North America students studying at universities in the UK, and ask questions about their experiences

Parents sessions: opportunities for parents to engage with universities and ask their questions

Counsellor sessions: opportunities for counsellors to engage with universities and ask their questions

1-2-1 meetings: the opportunity to book slots to engage with International Officers and ask your questions

REGISTRATION

The University of Manchester is Britain's largest single-site university, with a proud history of innovation and world firsts. Ranked 27 in the World, The University of Manchester is home to over 40,000 students from over 160 nationalities. We're proud to welcome over 10,000 international students on our campus, making us one of the most international universities in the UK.

The university can claim 25 Nobel Prize winners among former staff and students, and is where the atom was first split, the world's first stored-program computer invented and graphene discovered.

Manchester has an international reputation for research, the widest range of undergraduate and postgraduate degree programs in the UK, and is the most targeted university by UK's top 100 graduate employers (High Fliers Survey 2020).
