Welcome to the Lower Hooper Valley

This Devon County Wildlife Site is a haven for birds, insects and mammals in the heart of Exeter.

We are managing it to enhance and protect wildlife and to allow all to experience this peaceful site.

Please help us look after the site for wildlife and for people:

- Leave nothing but footsteps.
- Keep dogs under control and clean up any mess.
- Use alternative lit routes at night.
- Do not light fires or camp.
- Use alternative routes for bicycles to protect the soil.

**In case of any comments or issues,
please contact grounds@exeter.ac.uk**

**In case of any security issues, please
contact e.patrol@exeter.ac.uk**

Biodiversity

Meadows: managed to improve plant diversity and provide homes for insects, reptiles and mammals.

Scrub: The woodland edge is managed to maintain transition between woodland and grassland.

Woodlands: Some trees will be thinned to allow more light in and let different age trees to develop.

Standing deadwood: This is left where possible, as it has many biodiversity benefits.

- 1** Upper Highlands Meadow
- 2** Lower Highlands Meadow
- 3** Brookfield Meadow
