

Go to <https://ele.exeter.ac.uk/enrol/index.php?id=17606> or search for PGR Turnitin Submission for Upgrade following these steps.

1. Click the green block drawer

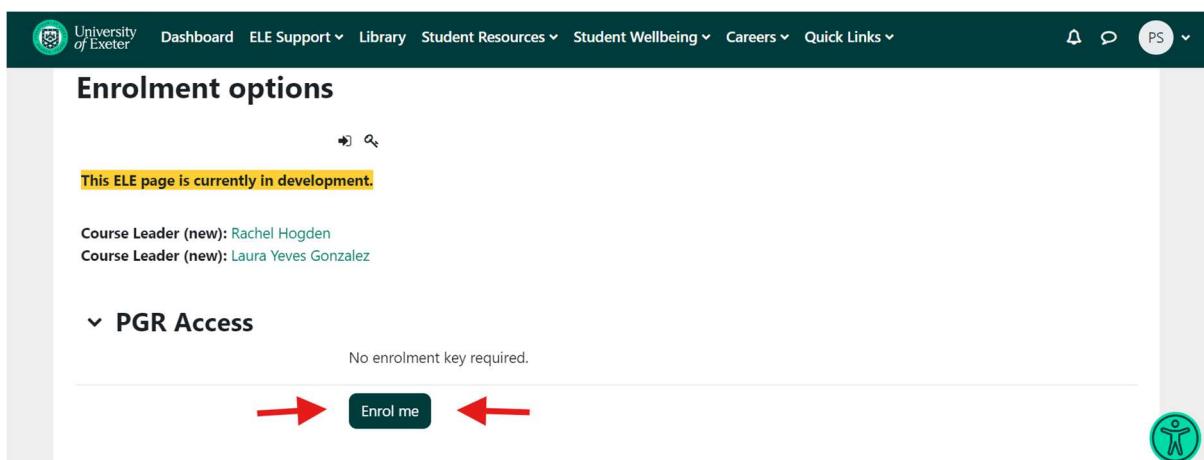

The screenshot shows the University of Exeter's ELE (Electronic Learning Environment) dashboard. At the top, there is a dark green header bar with the University of Exeter logo, a 'Dashboard' button (which is highlighted in green), and several other menu items: 'ELE Support', 'Library', 'Student Resources', 'Student Wellbeing', 'Careers', and 'Quick Links'. In the top right corner of the dashboard area, there is a green circular icon with a white figure. A red arrow is overlaid on the image, pointing to the top right corner of the main dashboard area, specifically to the close button (an 'X' icon) located in the top right corner of the green block drawer.

2. Search the course or a key word i.e. Turnitin

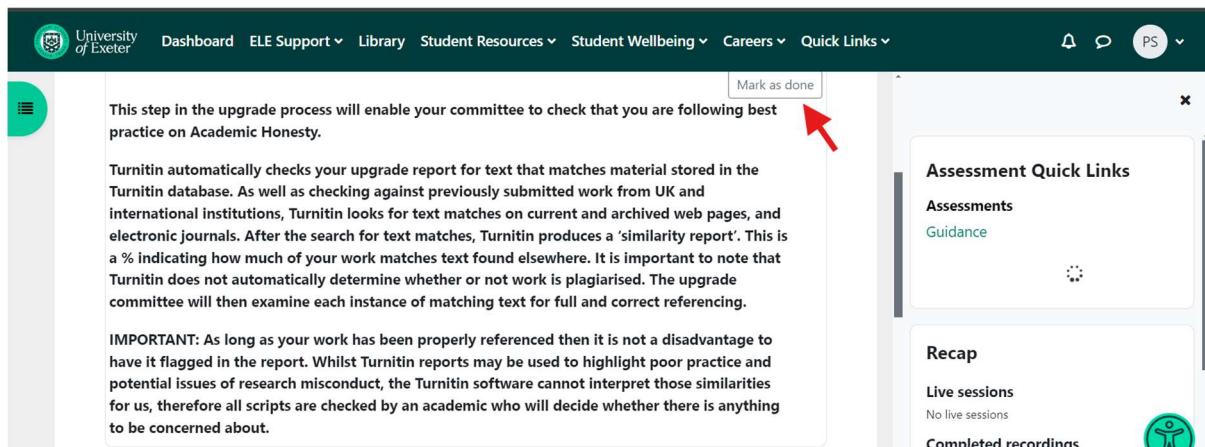

The screenshot shows the University of Exeter's ELE dashboard with a green block drawer open. The drawer contains a 'Course Search' panel with a search bar and a 'Course Index' link, and a 'Calendar' panel showing the month of August 2024. A red arrow is overlaid on the image, pointing to the top right corner of the green block drawer.

3. Enrol in the course

The screenshot shows the 'Enrolment options' page. The page header includes the University of Exeter logo, a 'Dashboard' button, and various menu items. Below the header, there is a message: 'This ELE page is currently in development.' Underneath this, there are two 'Course Leader (new)' entries: 'Rachel Hogden' and 'Laura Yeyes Gonzalez'. A section titled 'PGR Access' is expanded, showing the message 'No enrolment key required.' and a central 'Enrol me' button. A red arrow is overlaid on the image, pointing to the 'Enrol me' button.

4. Carefully read each section and click to “Mark as Done”

This step in the upgrade process will enable your committee to check that you are following best practice on Academic Honesty.

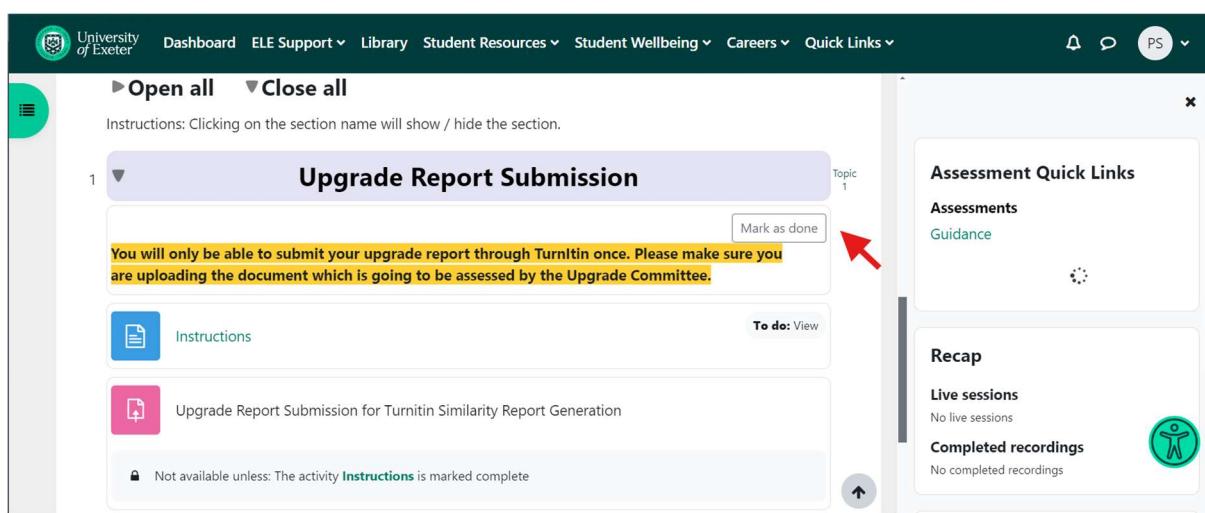

Turnitin automatically checks your upgrade report for text that matches material stored in the Turnitin database. As well as checking against previously submitted work from UK and international institutions, Turnitin looks for text matches on current and archived web pages, and electronic journals. After the search for text matches, Turnitin produces a 'similarity report'. This is a % indicating how much of your work matches text found elsewhere. It is important to note that Turnitin does not automatically determine whether or not work is plagiarised. The upgrade committee will then examine each instance of matching text for full and correct referencing.

IMPORTANT: As long as your work has been properly referenced then it is not a disadvantage to have it flagged in the report. Whilst Turnitin reports may be used to highlight poor practice and potential issues of research misconduct, the Turnitin software cannot interpret those similarities for us, therefore all scripts are checked by an academic who will decide whether there is anything to be concerned about.
